

## Forklift Front Vision Solution

**Recording Enabled**

The Forklift Front Vision Solution provides drivers with full vision, front and back, day and night while carrying loads. This monitoring system enhances productivity performance and time efficiency by expediting freight onloading and offloading. At the same time, it reduces property damage and personal injury while maximizing safety.

Designed by topnotch experts in the automotive safety field and made of Japanese and American components uses the latest technology especially engineered to crystallize vision under harsh outdoor operations.

### Improve

- Safety
- Visibility
- Efficiency/productivity
- Warehouse utilization

### Eliminate

- Accidents
- Neck and back injury to operator
- Damage costs of goods and racking
- Driver fatigue
